Introduction

Aquinas Catholic Schools recognizes the importance and benefits to education that the availability and usage of a network computer system, access to the Internet, wireless devices and emerging technologies gives teachers, administrators and students. Access to school technology equipment, network and wireless systems and other technological devices is intended for use as an educational tool, not for recreational use.

The Internet is a global network, and along with access to computers and people all over the world, comes the availability of material that may not be considered of educational or moral value in a Catholic school setting. However, Aquinas Catholic Schools believes that the information and interaction available on the worldwide network is valuable to teaching. Since anyone may create a web site, information found on the Internet must be scrutinized carefully. A school cannot be held responsible for false or misleading information obtained while online.

To maximize positive student experiences faculty and administrators will make every effort to provide students with the understanding and skills needed to use the Internet and other technologies in ways appropriate to their educational needs and personal safety. School personnel will use a variety of methods to guide students to information and resources consistent with educational and Catholic goals. Aquinas Catholic Schools utilizes a filtering system at each school to aid in blocking access to sites inconsistent with educational and Catholic goals. Staff, also, supervise students' use of the Internet. Despite its best efforts, the school cannot guarantee that students will not gain access to sites which may be offensive to individual family values. When possible, parents and the community will be partners with a school in its use of technology, and will be informed about their uses in a timely manner.

Please review this Acceptable Use Policy (AUP). You and your child will be required to read and sign the agreement before Internet use or full use of computers is granted in the lab or classroom. Please feel free to contact the school with any questions or concerns regarding the school's use of this Acceptable Use Policy. You are not required to grant permission for your child to use a computer or access the Internet. If you do not wish for your child to have access to the Internet, your child will be assigned an alternative activity in order to complete the lesson. The administration and faculty of Aquinas Catholic Schools firmly believes that technology provides appropriate tools for the educational setting. Also as more and more textbooks and classroom resources become digital, we need to know if your child has or is given access to a computer and the Internet at home. Please indicate on the AUP form whether your child has access to a computer and the Internet.

Confidentiality & Discipline

The school reserves the right to review any materials or files students have access to via the Internet, e-mail, account files, school and personal devices or other technology for their appropriateness in light of legal, ethical and Catholic standards. Any violation of this policy is also considered a violation of the general school discipline code as stated in the school student handbook and is subject to school disciplinary action. The privileges of using the computer network, Internet access or other means of technology can be suspended or revoked at any time. Please check each school handbook for additional technology rules/policies.

Students are permitted to possess personal WCD's on school property so long as the devices used during the instructional day, as directed by each school's rules or school personnel, and does not interfere with the learning environment. Please refer to your student(s) school handbook for additional information on how personal WCD's are used in those buildings.

Administrators may authorize individual students to use wireless communication devices for personal purposes when there is a reasonable need for such communication. Teachers and administrators may authorize individual students to use the devices for instructional purposes, provided they supervise the students during such use.

Access to the school's network is available but not guaranteed in all classrooms at all times. All communications made through the school's network is subject to filtering and monitoring. Reasonable suspicion is not required if a student freely, voluntarily and knowingly consents and agrees to the search of his or her wireless communication device. The scope of such searches must be reasonably related to the objectives of the search and not excessively intrusive in light of the nature of the suspected infraction.
- Violations of this policy may result in disciplinary action and/or confiscation of the WCD. The building principal may also refer the matter to law enforcement if the violation involves an illegal activity.
