

## A Message from Your Principal

St. Patrick Elementary

April 3, 2024

Hello St. Patrick School Families,

I want to start out by saying thank you for your generosity with the Warming Center meals, the Lenten jeans days, and your willingness to always help when you are asked to. Students may turn in their mite boxes to the office through Friday.

Next week is Severe Weather Awareness Week and we will be conducting a tornado drill on Thursday, April 11th at 1:45. We also conduct monthly fire drills and have practiced a shelter in place drill this year in case of any intruders. Student safety is a priority that we continue to improve in each and every year.

It was brought to my attention by multiple staff members that we have some of our students in grades 2-6 using swear words and other inappropriate language during the school day. This is unacceptable and I have let all students know that if they are caught using swear words or inappropriate language the consequence could be missing their end of the year field trip. Please have a conversation with your child(ren) regarding this issue.

It is hard to believe we are down to our last two months of the school year. This means that teachers are planning their end of the year field trips and I am happy that we will be able to bring parents along as chaperones. Your child(ren) teacher will be providing you with the information regarding the field trips.

In Partnership,  
Mrs. Koblitz
